

VEHICLE UPFITTING SERVICES BUILT AROUND THE WORK

Because service vehicles should make the job easier, not get in the way.

At Amarillo Upfitters, we design and build custom service trucks and vans around the people who use them every day. From complete vehicle builds to integrated equipment and storage systems, our vehicle upfitting services combine real-world experience with engineering expertise to provide work-ready vehicles built for your operation. And with **nationwide delivery**, we're the top choice for crews around the country.

AMARILLO
UPFITTERS

COMPLETE VEHICLE UPFITTING SERVICES

FLEET UPFITTING

Create consistency across your fleet with VIN-specific builds and fleet standardization capabilities. We'll develop repeatable specifications that account for the equipment and workflows your teams need in the field.

TRUCK UPFITTING

Build a service truck around your technicians and the work they perform. We engineer mechanic bodies, crane bodies, hydraulic systems, electric cranes, manual cranes and more. We also partner with **Ford (88WD6)** and **Ram (T3939)** for drop ship programs which save you big dollars on freight.

VAN UPFITTING

Turn your van into a mobile workspace with cutaway and enclosed van body upfits designed around your operation. Add shelving, drawer systems, flooring, lighting, storage and other equipment to keep tools organized and accessible.

CAPABILITIES OVERVIEW

From small service vans to Class 8 chassis, our team offers comprehensive upfitting capabilities for a wide range of custom fleet solutions. Our upfitting customization options include:

- Mechanics and crane bodies
- Hydraulic, electric and manual cranes
- Compressors and air tanks
- Shelving and drawer systems
- Lighting and flooring
- Bumpers and headache racks
- Vise mounts
- Graphics and vehicle wraps
- Cutaway and enclosed van body upfits
- Sage Oil Vac mobile lube equipment

OUR PROCESS

DISCOVER

We get to know your needs, budget and pain points.

DESIGN

Together, we decide what to include in your custom vehicle(s).

ENGINEER

We develop and validate the layout for performance, integration and safety.

REVIEW

We meet again to review the design and get approval.

BUILD

We turn the approved design into a custom work vehicle.

SUPPORT

We stick around to support you after delivery.

UPFIT

OUR STORY

Most service trucks aren't built with the operator in mind. Amarillo Upfitters was created to change that. By combining real-world insight with engineering expertise, we build service vehicles that solve specific operational challenges and perform to match the way they're actually used.

As part of the Sage Mfg. family, we bring together proven technologies and components — **like Sage Oil Vac pump-free fluid change systems** — to build integrated solutions matched to your work. We'll take care of the whole process, which means you only have one point of contact with a partner who works as hard as you do.

A FEW THINGS WE CAN DO

TURNKEY LUBE VEHICLE INTEGRATION

Customize a lube truck package with tanks, pumps, metering, filtration, DEF and spill containment. Every design is fully engineered, compliant with industry standards and designed for functionality.

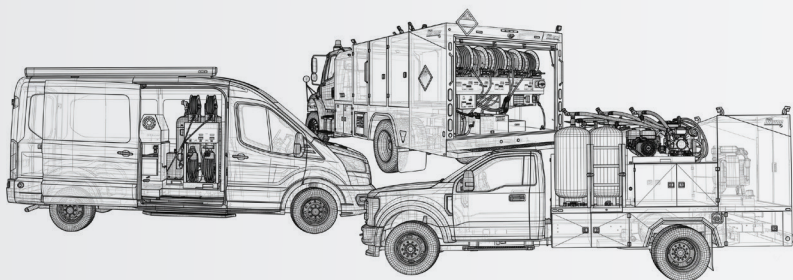

As part of the Sage Mfg. portfolio, we offer **exclusive access to pump-free Sage Oil Vac PM systems**. These solutions use vacuum pressure to move fluids for faster, safer and cleaner fluid changes.

CRANE BODIES AND HEAVY EQUIPMENT MOUNTING

Add new capabilities to your work vehicle with a hydraulic, electric or manual crane. We offer installation with PTO integration, outriggers, and load-rated hydraulic and electrical systems.

SERVICE BODIES, FLATBEDS AND GOOSENECKS

Level up your work with mechanic bodies and flatbeds designed for durability, payload and jobsite efficiency.

VAN INTERIORS AND UPFITS

Make the most of your space with drawer systems, shelving, lighting, anchoring, flooring, on-board power and mobile-workshop interiors built around your workflow.

POWER, AIR AND WELDING SYSTEMS

Create reliable on-site performance with compressors, air tanks, welders and all-in-one power units.

SAFETY, ACCESSORIES AND LIFTGATES

Build a safer workflow with lighting, cameras, warning systems, liftgates, headache racks, bumpers, and DOT- and OSHA-compliant safety solutions.
